DETAILED ACTION

EXAMINER'S COMMENT

In the IDS filed on 03/29/04 by Applicant, Document No. 2001-0025487 is not considered because it is not in compliance with § 1.97, i.e., no concise explanation of relevance of the document and/or no copy of the English-language translation of the document, or portion thereof, was provided. Therefore, the examiner has lined through it.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the Drawings, Figures 1 and 2 have been labeled as --PRIOR ART--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a back light device for LCDs having , inter alia, an extension electrode connected to an internal electrode provided at a second end of the fluorescent lamp, so that a plurality of fluorescent lamps are operated by a single inverter (claim 1). The remaining claim 2 is allowed by virtue of its dependency on the independent claim 1. Hence, the examiner has allowed claims 1 and 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kim et al., Patent No. 6,586,863 ; Ohe et al., Patent No. 6,295,110 ; Kamata et al., Patent No. 6,177,768; Moon, Patent No. 6,796,678; Bang et al., Patent No. 6,843,584; Winsor, Patent No. 5,914,560; McCanney, Patent No. 5,420,481; *Park et al., Pub. No. 2005/0127848.*

None of the above patents discloses the extension electrode as recited.
